

NO: 404/N/429

Date: 07/13/2025

To Whom It May Concern:

I am writing in my capacity as the CEO of Hamyar Mechanic Koosha, a knowledge-based and creative enterprise officially registered in Iran since 2016 (Registration No. 16162; National ID 14006916464). Our company operates at the forefront of assistive and rehabilitation technologies and is proud to serve as a national leader in addressing both domestic and global challenges in this field. Our products are developed in alignment with ISO 13485 standards and are supported by scientific validation, patents, and formal recognition from the Iranian Vice Presidency for Science and Technology.

It is with great respect and full professional affirmation that I confirm Dr. Nader Alirezaloo was formally invited and actively served as a judge in multiple national competitions and startup events focused on assistive and rehabilitation technologies, organized in collaboration with leading academic and scientific institutions. These events include:

1. ***The first National Startup Event on Assistive Technologies (Rehab Tech 2019)***, organized under the auspices of the Iranian Ministry of Science, Research, and Technology and hosted by the University of Social Welfare and Rehabilitation Sciences. Following a thorough evaluation of his professional qualifications. Dr. Alirezaloo was formally selected and invited to participate as a member of the judging panel for the evaluation of rehabilitation-related innovations in the context of an investment pitch competition. He actively participated in the event, where he served as a distinguished judge, evaluating applicant proposals, business plans, and registered innovations. He also submitted formal evaluation forms and rendered scoring decisions in accordance with the event's official review protocols.
2. ***The Second National Event of Assistive Technologies (2020)***, held in recognition of the International Day of Persons with Disabilities, brought together researchers, startups, and rehabilitation experts from across the country. Dr. Alirezaloo was formally invited to serve as a judge by official letter No. 99/172, dated December 1, 2020. He generously accepted the invitation and actively participated in the event, where he reviewed and assessed proposed ideas related to assistive technologies, offering expert evaluations that contributed meaningfully to the selection and promotion of high-potential innovations. In recognition of his invaluable contributions, he was awarded a formal Certificate of Appreciation.
3. ***The Third National Startup Event in the Field of Rehabilitation Technologies for Persons with Disabilities and the Elderly (2021)***, organized in collaboration with the University of Rehabilitation and Social Welfare Sciences, brought together innovators focused on improving the quality of life for individuals with disabilities and elderly populations. Dr. Alirezaloo was formally selected as a distinguished expert to serve on the

judging panel based on his specialized knowledge in rehabilitation technologies. He actively participated in the event as a member of the technical jury, where he evaluated a range of innovative solutions and startup proposals. His input—grounded in his professional expertise—was instrumental in determining the ranking and selection of the most promising innovations. In recognition of his valuable service, he received an official Certificate of Appreciation issued by the University.

In all of the above events, Dr. Alirezaloo's role was not honorary or symbolic. He actively participated in the peer review and formal evaluation of technological proposals submitted by inventors, researchers, and startups in the field of assistive and rehabilitation technologies—an area directly within his professional specialization. His contributions included scoring technical feasibility, assessing clinical applicability, and providing expert feedback to participants and organizing committees.

As the chief executive of a national-level enterprise deeply embedded in this field, I can attest that Dr. Alirezaloo's expertise added immense value to the integrity and success of these competitions. His professional judgment played a meaningful role in shaping the outcomes of the evaluations, identifying high-impact technologies for development and national implementation.

Please feel free to contact our office should further details or verification be required.

Sincerely,

Hamed Moayeri Kashani
